## WATER MAIN LINING

### Chestnut St

**(From Mechanic St to Payson St)**

The Foxborough Water Department has contracted with Sanexen and Onyx to clean and line the water main on Chestnut Street. Work is scheduled to begin Monday October 3<sup>rd</sup>.

This project involves the following:

- Setup of a temporary water main, including chlorination, sampling, and connecting homes – October 3<sup>rd</sup> to October 24<sup>th</sup>.
- Connecting homes to the temporary water main – water department staff and/or the contractor will be in touch with each property owner to gain access to house for this purpose.
- Excavation of the road where pits are required for cleaning and lining – scheduled October 18<sup>th</sup> to November 2<sup>nd</sup>.
- Cleaning and lining of the water main – scheduled October 25<sup>th</sup> to November 16<sup>th</sup>.
- Testing, Backfilling pits, and Road restoration – scheduled November 9<sup>th</sup> to November 25<sup>th</sup>.
- Disinfection of the lined water main and removal of bypass – November 28<sup>th</sup> to December 13<sup>th</sup>.
- Final Cleanup – December 12<sup>th</sup> to December 16<sup>th</sup>.

Please plan for extra time when entering or exiting this stretch of Chestnut Street, as the roadway may be narrowed in this construction zone.

This project is the next step in eliminating the brown water problems that have frustrated residents over the years. We are also planning for the construction of the new treatment plant on Pump Station Rd to begin in 2017, which should be the final step in infrastructure work along Chestnut Street.

We apologize for any inconvenience this may cause, and thank you for your patience. Questions may be directed to the Water Department at (508) 543-1209.
